

PRODUCT ROADMAP

Opsryx Roadmap: October 2026 to January 2027

The path to a full manufacturing ERP for UK fabrication and assembly businesses.

SECTION 1

Live today

Everything on these pages is in Opsryx now, at app.opsryx.com. It runs the work from quote to invoice on a single system built for UK fabrication and assembly shops.

LIVE

Shop floor

- **Floor Board:** live board of running, idle, down and maintenance machines, open and late jobs, ready to ship, outside work and who is clocked in.
- **Terminal:** operators clock in, pick a job and station, then claim, advance, hold or release work.
- **Late Jobs** highlighted on the Dashboard, Jobs board and Floor Board.
- Machines with utilisation and hours per day, plus fixtures and tools with a checkout conflict check.

Jobs and scheduling

- **Jobs Kanban** with draggable cards across your own production stages, saved views and CSV import/export.
- Job detail with quote-vs-job comparison, costing, materials, quality, despatch, documents, history and a printable job card with QR code.
- **Schedule** by day or machine over 1, 3 or 6 weeks, with overload warnings and time off shown.
- **Capacity** load board with a plant calendar for shutdowns, bank holidays, Saturday overtime and absence.
- **Times library** of setup and run standards with actual-vs-standard variance, and **Operator match** to rank the best-placed operator.

Sell and ship

- **Quotes** built from stock prices and labour rates, converted straight to a job.
- **Customers** with a basic orders view and progress emails.
- **Despatches** with consignments, part shipments, delivery or collection, and proof of delivery.
- **Invoices** from proforma and deposit through to UK tax invoice, with receipts, allocation and credit notes.
- **Outside work** board for subcontract processes, due-back dates and costs feeding job margin.

Materials

- **Inventory** with lots, certificates, quarantine and release, and customer-owned stock.
- **Picks** by stage kit or whole job, with FIFO lots and shortages; **stock takes** with blind counts.
- **BOMs** with revisions and where-used, feeding **MRP** shortages and suggested ordering.
- **Purchase orders** with goods-in booked to stock; **payables** with three-way match of supplier invoice, PO and passed goods-in.
- **Suppliers** master with contacts, terms and PO history.

SECTION 1 CONTINUED

Live today

Quality and people

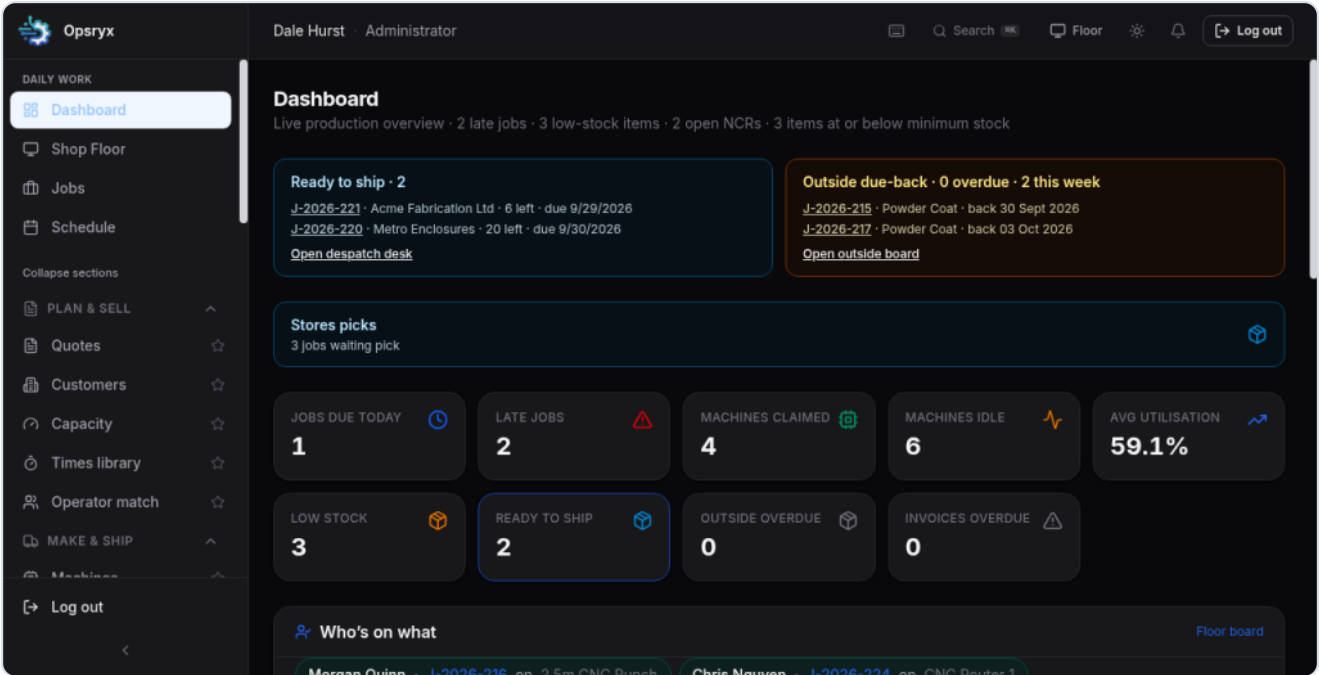

- **Inspections**, first article inspection (FAI) packs, first-off sign-off and **NCRs** with scrap and rework.
- **Document approval on upload**: new uploads and revisions start as draft and need approval, with drawings on the job detail.
- **SOPs** with step-by-step photos; **maintenance** scheduling with gauge and calibration due dates.
- **Employees** with roles and skills, **time off** with approvals and entitlements, and **timesheets** with approval.
- **Notice board** for safety notices, meetings and events.

Insight and admin

- **Reports** including on-time rate, at-risk jobs, supplier delivery, aged debt, utilisation, downtime and **job profitability**.
- **AI Assistant**: plain-English, read-only questions about jobs, machines, stock, quotes, despatch and quality.
- **Audit log** of claims, status changes, invoices, users and logins.
- **Settings** for users, shop hours, plant rules, two-factor sign-in, backups and invoicing, including Xero, QuickBooks and Sage connection fields.

Accounts today: Opsryx raises quotes, proformas, tax invoices and credit notes, and matches supplier invoices. Accounts are exported by CSV today, with Xero, QuickBooks and Sage connection settings in place. Live sync is Target Nov 2026 and the built-in ledger is Target Jan 2027.

Dashboard

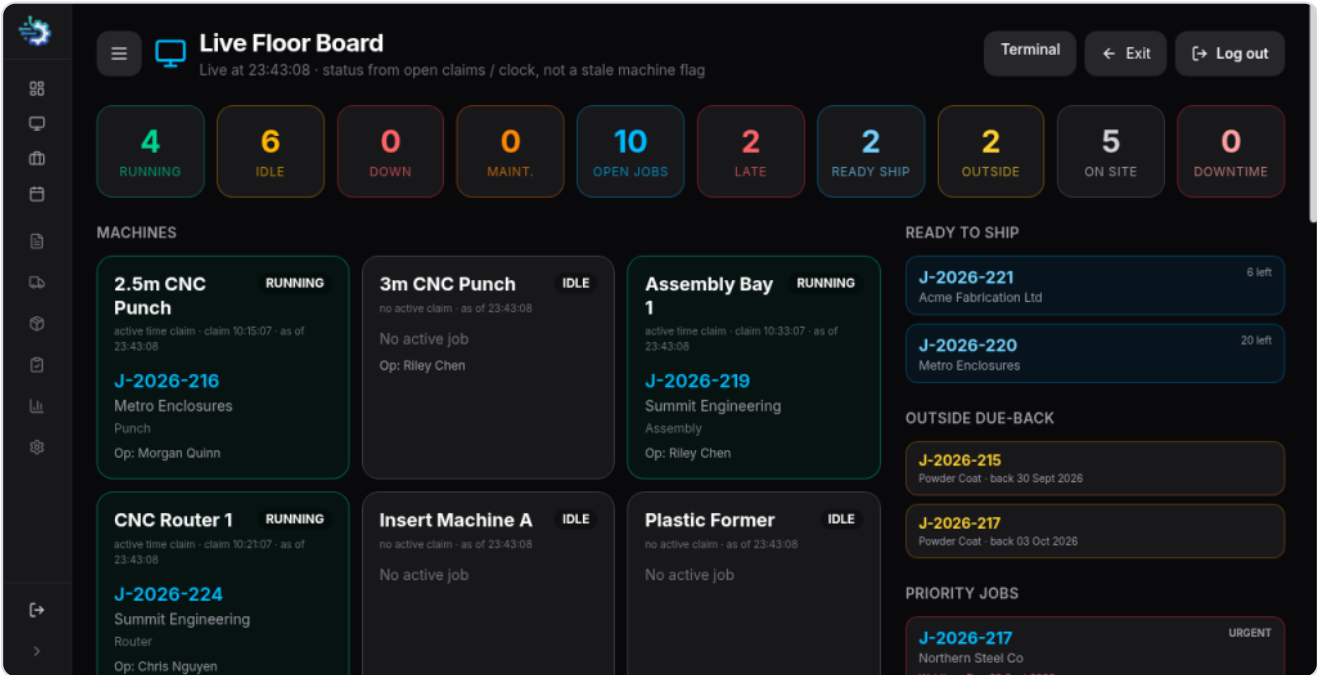

The Dashboard: late jobs, low stock, open NCRs, jobs due today, machine utilisation, ready to ship and invoices overdue at a glance. Sample data shown.

SECTION 1 CONTINUED

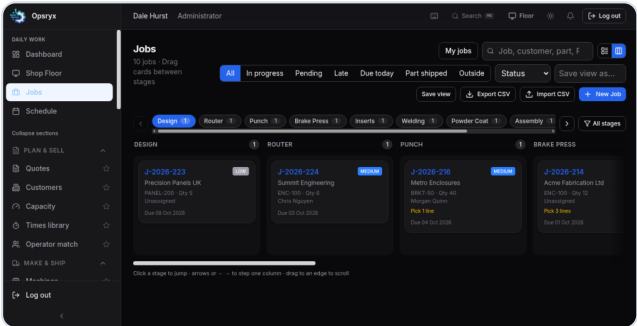

Live today, in the app

Floor Board

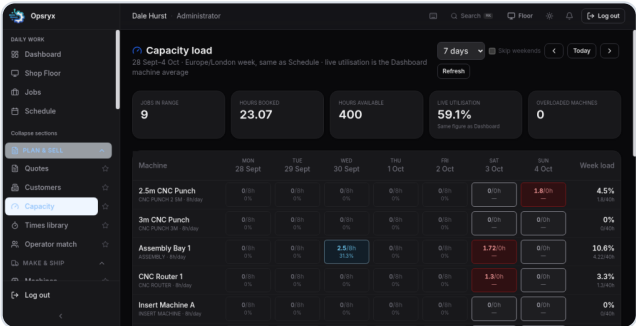

Live machine and job status for the whole floor, driven by operator claims and clock-ins.

Jobs Kanban

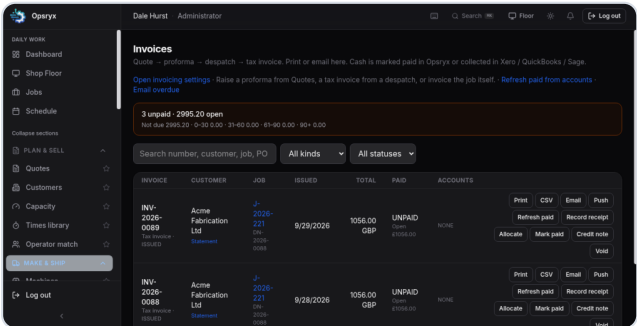

Jobs move across your own production stages, from design through to despatch.

Capacity

Load by machine and day, with the plant calendar and live utilisation.

Invoices

Quote to proforma to despatch to tax invoice, with receipts and credit notes.

Sample data. Screenshots are taken from the live app at app.opsryx.com using demonstration records.

SECTION 2

Month by month

Every milestone below is a target, not a finished feature, and dates can move.

TARGET MMM YYYY	PLANNED MMM YYYY	AREA
October 2026 Tighter control on the floor and in stores, and a smooth start for every role.		
Quarantine release with reason and approver sign-off Releasing a quarantined lot asks for a reason and a named approver, kept in the audit log.	TARGET OCT 2026	QUALITY / ISO
Controlled drawings Only the latest approved revision reaches the floor, older revisions are marked superseded, and there is no quick upload without a revision.	TARGET OCT 2026	QUALITY / ISO
Outside-work return confirmation A return is only recorded when goods are confirmed back; cancelling never records a return.	TARGET OCT 2026	SHOP FLOOR
Session reliability and hardening Sessions that stay dependable through long shifts, plus further security hardening.	TARGET OCT 2026	SHOP FLOOR
Role-based onboarding Day-one checklists for each role: Supervisor, Operator, Stores and Office.	TARGET OCT 2026	PEOPLE & TRAINING
November 2026 Deeper quality records and the start of the full order-to-cash flow.		
Full CAPA on NCRs Root cause, corrective and preventive actions and an effectiveness check on every NCR.	TARGET NOV 2026	QUALITY / ISO
Measured-value inspections Record actual measurements against nominal and tolerance, not just pass or fail.	TARGET NOV 2026	QUALITY / ISO
Calibration history with certificates A full calibration record per gauge, with certificates attached to each entry.	TARGET NOV 2026	QUALITY / ISO
In-app guides Step-by-step help inside the screens people use every day.	TARGET NOV 2026	PEOPLE & TRAINING
Sales orders module A dedicated sales-order workflow linking quote, jobs, despatch and invoice.	TARGET NOV 2026	COMMERCIAL & FINANCE
Live Xero, QuickBooks and Sage sync Invoices and payments flowing to and from your accounts package, in place of CSV.	TARGET NOV 2026	COMMERCIAL & FINANCE

December 2026

The management system around the work, and the groundwork for accounts.

Internal audit

Plan, run and record internal audits with findings linked to actions.

TARGET DEC 2026

QUALITY / ISO

Management review

Structured review meetings drawing on quality, delivery and supplier data already in Opsryx.

TARGET DEC 2026

QUALITY / ISO

Risk register

Risks and opportunities with owners, ratings and actions.

TARGET DEC 2026

QUALITY / ISO

Role-view permissions

Each role sees the screens and actions it needs, and nothing more.

TARGET DEC 2026

PEOPLE & TRAINING

Training and certificate expiry feeding the skills gate

Expired training or certificates stop an operator being matched to work that needs them.

TARGET DEC 2026

PEOPLE & TRAINING

CRM basics

Leads, a simple sales pipeline and activity tracking alongside quotes and customers.

TARGET DEC 2026

COMMERCIAL & FINANCE

Ledger foundations

Chart of accounts, journals and bank reconciliation.

PLANNED DEC 2026

COMMERCIAL & FINANCE

January 2027

The full ERP milestone: finance, supply-chain quality and audit evidence in one place.

FULL ERP MILESTONE

Built-in ledger, or keep your accounts package

Target Jan 2027: built-in ledger with MTD-compatible VAT returns, or keep Xero, QuickBooks or Sage connected. The choice stays with you.

TARGET JAN 2027

COMMERCIAL & FINANCE

Supplier approval and SCARs

Approved supplier status and supplier corrective action requests linked to goods-in and NCRs.

TARGET JAN 2027

QUALITY / ISO

Clause-mapped ISO 9001 evidence pack

Evidence from across Opsryx gathered and mapped to ISO 9001 clauses for your auditor.

TARGET JAN 2027

QUALITY / ISO

Customer portal

Customers can check order and job progress without phoning or emailing.

TARGET JAN 2027

COMMERCIAL & FINANCE

SECTION 3

Timeline at a glance

All milestones by area, October 2026 to January 2027. Every item is a target or planned work.

TARGET		PLANNED		FULL ERP MILESTONE	
	Oct 2026	Nov 2026	Dec 2026	Jan 2027 · Full ERP	
Shop floor	● Outside-work return confirmation ● Session reliability and hardening				
Quality / ISO	● Quarantine release sign-off ● Controlled drawings	● Full CAPA on NCRs ● Measured-value inspections ● Calibration history and certificates	● Internal audit ● Management review ● Risk register	● Supplier approval and SCARs ● ISO 9001 evidence pack	
Commercial & finance		● Sales orders Live Xero / ● QuickBooks / Sage sync	● CRM basics ● Ledger foundations (planned)	Built-in ledger + MTD ● VAT, or keep your package ● Customer portal	
People & training	● Role-based onboarding	● In-app guides	● Role-view permissions ● Training expiry and skills gate		

Payroll, multi-site and a native mobile app are planned for later in 2027 and are not yet dated (see page 8).

SECTION 4

Where Opsryx will be in January 2027

- One system from first enquiry to final payment: leads and quotes, sales orders, jobs, scheduling, materials, purchasing, despatch and invoicing.
- Your own choice of accounts: a built-in ledger with MTD-compatible VAT returns, or keep Xero, QuickBooks or Sage connected.
- A shop floor that runs on live information, with the right drawing revision at the station and every operator matched to work they are trained for.
- A quality system that is ISO 9001-ready: NCRs with full CAPA, measured inspections, calibration records, internal audit, management review, risk and supplier control, and an evidence pack for your auditor.
- Customers who can see their order progress without chasing, and staff who each see the screens their role needs.

Beyond January: planned for 2027

PLANNED 2027

Payroll: Pay runs built on the timesheets and time off already in Opsryx.

Multi-site: Running more than one plant from a single Opsryx account.

Native mobile app: A dedicated app for phones and tablets on the shop floor and on the move.

Not yet dated. We will set targets once the January milestones are in place.

About these dates. Everything outside the “Live today” section is planned work. Months shown are targets and can move as we test and refine each release. Opsryx helps you run an ISO 9001-ready quality system; certification itself is awarded by your certification body.

See it on your own jobs

Book a demo and we will walk through Opsryx using the way your shop works today.
